But what exactly is it all about? Interior decorating is the change of appearance of an interior space in order to achieve a different ambiance than the one you currently have. Before decorating, a study is made of the possibilities of that space, it is analyzed if it is well distributed or if it can be improved. The character of the space is established, considering aspects such as light, proportion, size, furniture, colors and distribution. Taking this into account, we can reach the solution of problems and a positive change in the environment. Let's remember that environments influence people's moods. An unpleasant environment can be felt, even if the person has no knowledge of decoration. And in some cases, such as clutter, mental and emotional disharmony can occur.
